Chapter 7. Review Questions. Explain the difference between framework & theory based on their characteristics (at least 3). Frameworks are a “brief explanation” of a theory or portions of a theory to be tested in a study. A framework reflects the researcher’s theory or idea about the study. The framework may be implicit and a theory is more abstract than concrete; a theory focuses on the general aspects.

Chapter 7: Research design. As stated in the introduction, the research design adopted in this inquiry was primarily influenced by Guba and Lincoln's (1985) conception of Naturalistic Inquiry, which they later acknowledged was a form of Constructivism (Guba and Lincoln, 1998), and to a lesser extent Charmaz's (2006) constructivist conception of Grounded Theory.

In survey research, social desirability refers to the idea that respondents will try to answer questions in a way that will present them in a favorable light. (You may recall we covered social desirability bias in Chapter 5.) Let's go back to our example about transitioning to college to explore this concept further.

The guidelines for research questions previously described in this chapter still apply, but there are some new elements to qualitative research questions that are not present in quantitative questions. First, qualitative research questions often ask about lived experience, personal experience, understanding, meaning, and stories. These keywords indicate that you will be using qualitative methods. Second, qualitative research questions may be more general and less specific.
