There may be specific problems plaguing boats in your region, such as weeds clogging water intakes or a shipment of bad gas. Many specifications, including spark plug gap and full-throttle rpms can be found on the spark arrestor (air intake) cover. The Mercruiser Service Manual specific to your engine can be a valuable reference.

Re: Chevy 350 Engine/Mercruiser 5.7 Problems!! I put the boat in the shop on July 29th and just got it back 2 days ago. That is 2 weeks in the shop to replace a fuel pump/system and re-do some wiring with fuel hoses and such.

~~Chevy 350 Engine/Mercruiser 5.7 Problems!! | Boating Forum ...~~

Well, Mercruiser called and they want one more test done. They want to decarbonize the cylinders to see if the rings are stuck. If that doesn't work (they will do a leak down test after that), then they will give me a new engine. To be honest I would prefer a quick fix as taking out the engine and replacing it will be a nerve racking exercise!

~~Mercruiser MAG 350 Problems — Rinker Boat Company~~

Air vent in fuel cap not open. Faulty emergency kill switch. Some engines -- not the pull-start kind -- have a battery that starts it. If your engine has a battery, make sure it is charged up before use; verify the battery connections are clean -- as corroded connections can keep a Mercury outboard from starting.
